Medicinal Uses

Dhania or coriander, *Coriandrum sativum*, is an herb that has different culinary and medicinal uses. The following are some of the therapeutic benefits it provides for digestion improvement, bloating reduction, and relief from acidity, using its seeds and leaves. It has detoxifying properties, hence helping in the elimination of heavy metals and toxins from the body. Dhania supports general health by regulating blood sugar and cholesterol levels and heart conditions. Its antioxidant properties promote the skin's health, combating oxidative stress. And finally, coriander exerts mild diuretic effects, which help the kidneys and control urinary tract infections.
