

Product Details

Gambhari

Gambhari (*Gmelina arborea*), commonly called white teak or beechwood, is a fast-growing deciduous tree from the Lamiaceae family. Native to India and widely distributed across tropical Asia, it thrives in fertile, moist soils and often grows up to 30 meters tall with a straight trunk and broad, spreading crown. The tree bears large, heart-shaped leaves and clusters of yellow, trumpet-like flowers that enhance its beauty. Its fleshy greenish-yellow fruits are relished by birds and animals, helping in natural seed dispersal and regeneration.

Gmelina arborea

White Teak

Active Ingredients

Part Used: Bark

Ratio: 8:1 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

LET'S TALK

Medicinal Uses

Gambhari is highly regarded as a key member of the Dashamoola group of herbs, known for their strengthening and rejuvenating effects. Various parts of the plant, roots, bark, leaves, and fruits are used in traditional remedies. It is valued for easing respiratory issues, fever, and inflammation due to its antipyretic and anti-inflammatory properties. Gambhari also supports digestion, boosts vitality, and helps in conditions like cough, anemia, and skin problems, making it an important herb for overall health and wellness.

Form: Powder*
