

Product Details

Harsinghar, Parijat

It is a small deciduous tree native to the Indian subcontinent and Southeast Asia. It is widely recognized for its fragrant flowers that bloom at night. The tree typically grows up to 10 meters in height and has slender, lance-shaped leaves that are opposite in arrangement. Harsinghar produces small, white flowers with orange centers that emit a strong, pleasant fragrance, especially during the evening. It is commonly found in gardens, temples, and along roadsides due to its aromatic flowers and ornamental value.

Nyctanthes arbor-tristis

Night-flowering Jasmine, Coral Jasmine

Active Ingredients

-

Part Used: Leaves

Ratio: 5:1 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

Medicinal Uses

Nyctanthes arbor-tristis (Harsinghar) is highly regarded in traditional medicine for its various therapeutic properties. The flowers, leaves, and bark of the tree are used to treat a wide range of ailments. The plant is known for its anti-inflammatory, analgesic, and antipyretic effects, making it useful in treating fevers, colds, and pain. Harsinghar is also used in the management of skin conditions, including rashes and infections, due to its antiseptic properties. The leaves are believed to have hepatoprotective benefits and are used in liver-related disorders, while the flowers are often used in remedies for insomnia, stress, and anxiety. Additionally, it is considered helpful in improving digestive health and managing conditions like constipation and indigestion.
