Kateli, Kantakari

Kateli, also called Kantakari (*Solanum xanthocarpum*), is a thorny perennial herb belonging to the Solanaceae family. It is commonly found across India in dry fields, wastelands, and along roadsides. The plant is characterized by its spiny stems, purple flowers, and small round berries that turn yellowish-green when ripe. Known for its resilience in harsh conditions, Kantakari is considered an important Ayurvedic herb and is one of the ten roots included in the Dashamoola group.
