

Product Details

Khair, Khadira

Khadir, also called Khair (*Acacia catechu*), is a deciduous tree of the Fabaceae family, widely distributed across India and Southeast Asia. It grows to a height of 10-15 meters, with dark, rough bark and delicate, feathery leaves. The tree bears small yellow flower clusters and flat seed pods, while its heartwood produces catechu or katha, a dark extract traditionally used in paan and for medicinal as well as tanning purposes. *Acacia catechu* is highly valued for both its commercial and therapeutic significance.

Acacia catechu

Cutch Tree

Active Ingredients

30% Tannins

Part Used: Bark

Ratio: 15:1 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

Medicinal Uses

Khadir is an important Ayurvedic herb known for its cleansing, astringent, and restorative qualities. Its bark and extract are used to support oral health, treating gum ailments, sore throat, and mouth ulcers. With its cooling, antioxidant, and anti-inflammatory properties, it helps in managing diarrhea, skin diseases, blood impurities, and respiratory issues. Khair is also recognized as a natural detoxifier that aids digestion, boosts immunity, and contributes to overall health and wellness.

Form: Powder*

* Soft/Paste form also available

Size: 1kg, 5kg, 25kg

Packaging Type: HDPE Drum

Country of Origin: India
