

Product Details

Khajur

Khajur (*Phoenix dactylifera*), popularly known as the Date Palm, is an evergreen tree of the Arecaceae family, widely cultivated in arid and semi-arid regions. Growing up to 20-25 meters tall, it has a sturdy, straight trunk topped with large, feather-like fronds. The tree bears clusters of oblong, sweet fruits called dates, which are prized for their rich taste and high nutritional value. Adapted to withstand dry climates, the date palm is one of the oldest cultivated fruit trees and holds great economic and cultural importance.

Phoenix dactylifera

Date Palm

Active Ingredients

Part Used: Fruit

Ratio: 3:1 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

LET'S TALK

Medicinal Uses

Khajur is well-regarded for its nourishing and strengthening qualities in traditional medicine. Dates are abundant in natural sugars, fiber, vitamins, and minerals, making them an excellent source of quick energy and digestive support. They also exhibit antioxidant and anti-inflammatory properties that contribute to heart health and stronger immunity. In Ayurveda and folk remedies, Khajur is used for managing fatigue, anemia, and respiratory issues, while also enhancing reproductive health and overall vitality.
