

Product Details

Mamejeva

Mamejeva, *Enicostemma littorale*, is a small herb native to coastal regions of India. It features small, delicate purple flowers and grows in sandy, coastal soil. In traditional medicine, Mamejeva is known for its medicinal properties, particularly for its ability to treat digestive disorders, promote liver health, and support overall detoxification. It is also used for its anti-inflammatory, antioxidant, and antimicrobial effects. Mamejeva is commonly used in herbal formulations to support the immune system and improve skin health.

LET'S TALK

Medicinal Uses

Mamejeva (*Enicostemma littorale*) is a medicinal plant used in traditional Ayurvedic medicine for its wide-ranging health benefits. It is known for its anti-inflammatory, antidiabetic, and antimicrobial properties. Mamejeva is often used to manage diabetes by helping regulate blood sugar levels and improving insulin sensitivity. It is also effective in treating digestive issues such as indigestion, bloating, and constipation. Additionally, the plant is used to reduce fever, enhance liver function, and promote detoxification. Mamejeva is considered a potent herb for boosting immunity, improving skin health, and supporting overall wellness.
