

Product Details

Mehandi

Mehandi (Lawsonia alba), also known as Henna, is a perennial shrub of the Lythraceae family, widely grown in tropical and subtropical climates. Reaching a height of 2-6 meters, it bears small fragrant white or pink flowers and elongated green leaves. When dried and powdered, these leaves produce a natural dye traditionally used to color hair, skin, and textiles. Beyond its cultural and cosmetic value, Mehandi is also recognized for its medicinal importance.

Lawsonia alba

Henna

Active Ingredients

Part Used: Leaves

Ratio: 5:1 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

LET'S TALK

Medicinal Uses

Mehandi is valued in Ayurveda for its cooling, healing, and antimicrobial qualities. Its leaf paste is applied to soothe burns, cuts, and skin irritations, while also supporting scalp health by reducing dandruff and strengthening hair. With antifungal and antibacterial properties, it helps prevent infections and promotes overall skin wellness. Its natural cooling effect is also used to relieve body heat and fever, making Henna a versatile herb for both cosmetic and therapeutic uses.

Form: Powder*

* Soft/Paste form also available

Size: 1kg, 5kg, 25kg

Packaging Type: HDPE Drum

Country of Origin: India
