

Product Details

Sarpagandha

It is a small, evergreen, perennial shrub native to India and Southeast Asia. It grows up to 60 cm in height and thrives in tropical and subtropical climates. The plant has elongated, lance-shaped, dark green leaves arranged in whorls of three. Its flowers are small, tubular, and usually pink, purple, or white, blooming in clusters at the tip of branches. The plant produces small, round, reddish-black berries that contain seeds. The roots of Sarpagandha, which grow deep into the soil, are the primary part used for medicinal purposes due to their potent therapeutic properties.

Rauvolfia serpentina

Indian snakeroot

Active Ingredients

4% Alkaloids

Part Used: Root

Ratio: 7:1 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

LET'S TALK

Medicinal Uses

Sarpagandha is renowned in Ayurveda for its hypotensive, sedative, and anti-hypertensive properties. It is primarily used to reduce high blood pressure, calm the nervous system, and manage insomnia. The active compound reserpine found in its roots helps lower blood pressure and induces relaxation by affecting the central nervous system. Sarpagandha is also effective in treating anxiety, mental agitation, and epilepsy. Additionally, it is used to manage snake bites, insect stings, and certain skin conditions. Due to its powerful effects, it should be used under medical supervision to avoid adverse side effects.

Form: Powder*

* Soft/Paste form also available

Size: 1kg, 5kg, 25kg

Packaging Type: HDPE Drum

Country of Origin: India
