

## Product Details

### Vilaiti Imli

It is a small, evergreen tree native to India and Southeast Asia. It grows up to 5-6 meters in height and thrives in tropical climates with well-drained soil. The tree bears glossy, dark green leaves and small, yellowish flowers that bloom in clusters. Its fruit is small, pumpkin-shaped, and greenish-yellow, turning reddish when ripe. The outer rind of the fruit is thick and contains hydroxycitric acid (HCA), the active compound responsible for its medicinal properties. Due to its sour taste and high nutritional value, the fruit is used in traditional medicine.

### Garcinia cambogia

Malabar Tamarind

#### Active Ingredients

50% Hydroxycitric acid

#### Part Used: Fruit

Ratio: 5:1 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

#### Medicinal Uses

Vilaiti Imli is highly valued for its weight management and appetite-suppressing properties. The active compound hydroxycitric acid (HCA) helps inhibit fat production by blocking the enzyme that converts excess carbohydrates into fat. It is also known to boost metabolism, reduce cravings, and improve digestion. Additionally, Garcinia cambogia has antioxidant and anti-inflammatory properties that support overall health. It is often used in Ayurvedic formulations to regulate cholesterol levels, manage obesity, and promote healthy digestion. However, it should be consumed in moderation and under proper guidance for best results.

Form: Powder\*

\* Soft/Paste form also available

Size: 1kg, 5kg, 25kg

Packaging Type: HDPE Drum

Country of Origin: India
