

Product Details

Anar chhilka, Dadim

Anar Chhilka, derived from the pomegranate (*Punica granatum*), is the outer rind or peel of the fruit. Pomegranate is a small deciduous tree or shrub, native to the Mediterranean region but widely cultivated across India. The tree produces round, red fruits with thick, leathery skin and juicy seeds inside. The peel, often discarded as waste in culinary use, is rich in bioactive compounds, giving it notable medicinal value. It has a slightly bitter and astringent taste and is commonly used in powdered or extract form in traditional medicine.

Active Ingredients

-

Part Used: Fruit Pericarp

Ratio: 5:1 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

LET S TALK

Medicinal Uses

Anar Chhilka is highly valued in Ayurveda for its astringent, antioxidant, and antimicrobial properties. It helps in managing digestive issues such as diarrhoea, dysentery, and intestinal parasites due to its natural astringency. The peel is also used to support heart health, regulate blood sugar, and improve skin health, thanks to its rich content of polyphenols, tannins, and flavonoids. Additionally, it exhibits anti-inflammatory effects, aids in wound healing, and strengthens immunity, making it a versatile component in herbal formulations.

Form: Powder*

* Soft/Paste form also available

Size: 1kg, 5kg, 25kg

Packaging Type: HDPE Drum

Country of Origin: India

Punica granatum

Pomegranate
