

# Product Details

## Babchi

Babchi is an annual herb belonging to the Fabaceae family. Native to India and widely cultivated in tropical and subtropical regions, the plant grows up to 1 meter in height with erect, branched stems, trifoliate leaves, and small white or purple flowers. The seeds, known as Babchi seeds, are small, dark brown to black, and highly valued for their medicinal properties. These seeds contain a rich concentration of bioactive compounds, including psoralen, which is responsible for many of their therapeutic effects.

## Psoralea corylifolia

Bakuchi

### Active Ingredients

-

### Part Used: Seeds

Ratio: 10:1 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

### Medicinal Uses

Babchi seeds are highly regarded in Ayurveda for their antioxidant, antimicrobial, and immunomodulatory properties. They are traditionally used to manage skin disorders such as vitiligo, psoriasis, and eczema due to their ability to stimulate pigmentation and promote skin health. Additionally, Babchi seeds support bone health, enhance reproductive function, and boost overall immunity. Rich in flavonoids, coumarins, and essential oils, they are also used in formulations for digestive support, respiratory health, and as a natural tonic to improve vitality and well-being.

Form: Powder\*

\* Soft/Paste form also available

Size: 1kg, 5kg, 25kg

Packaging Type: HDPE Drum

Country of Origin: India
