

Product Details

Kamalpushp, Nilofar

Kamalpushp is an aquatic perennial plant belonging to the Nelumbonaceae family. Commonly known as the Indian Lotus, it grows in ponds, lakes, and slow-moving water bodies across India. The plant has large circular floating leaves, long stalks, and produces magnificent pink or white flowers that are highly fragrant and symbolic in Indian culture. Various parts of the lotus flowers, seeds, stamens, and roots are used in traditional Ayurvedic medicine. Kamalpushp thrives in nutrient-rich, shallow waters under warm, sunny conditions.

Nelumbo nucifera

Lotus

Active Ingredients

-

Part Used: Flower

Ratio: 6:1 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

Medicinal Uses

Kamalpushp is traditionally used in Ayurveda for its cooling, cardiotonic, and rejuvenating properties. The flowers help calm the mind, reduce stress, and support heart health. Lotus also exhibits anti-inflammatory, antioxidant, and astringent effects, making it beneficial for skin care, bleeding disorders, and digestive issues. Rich in flavonoids, alkaloids, and essential nutrients, it supports immunity, metabolic function, and overall vitality. Its therapeutic properties make Kamalpushp a valuable ingredient in herbal formulations for mental relaxation, skin wellness, and general health support.
