

Product Details

Sarphankha

Sarphankha, scientifically known as *Tephrosia purpurea*, is a perennial herb belonging to the Fabaceae family. It is widely found in India, growing in open fields, wastelands, and along roadsides. The plant has erect or spreading stems, pinnate leaves, and produces purplish-red flowers in clusters. The roots, leaves, and seeds are used in traditional Ayurvedic medicine. Sarphankha thrives in well-drained soils under sunny conditions and is valued for its therapeutic properties.

Wild Indigo, Purple Tephrosia

Active Ingredients

-

Part Used: Whole plant

Ratio: 9:1 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

Medicinal Uses

Sarphankha is traditionally used in Ayurveda for its hepatoprotective, anti-inflammatory, and diuretic properties. The plant helps support liver function, manage urinary disorders, and reduce inflammation. It also exhibits antimicrobial, antioxidant, and adaptogenic effects, promoting overall immunity and wellness. Rich in flavonoids and other bioactive compounds, Sarphankha is used in herbal formulations for detoxification, respiratory support, and general vitality. Its therapeutic properties make it a valuable ingredient in traditional medicine for maintaining liver, urinary, and overall health.

Form: Powder*
