

Product Information

Ajmoda

Ajmoda seeds are small, aromatic, brownish-grey, with a warm, spicy fragrance. The parent plant is a biennial herb with grooved, hollow stems, bright green pinnate leaves, and compound umbels of tiny white flowers. The seeds have a strong, pungent, slightly bitter taste due to their rich essential oil content. Cultivated in temperate to subtropical regions, Ajmoda is used as a spice, condiment, and medicinal herb.

Apium graveolens

Celery

Active Ingredients

Dry Powder Extract

Active: -

Ratio: 10:1

Soft Paste Extract

Active: -

Ratio: 7:1

Part Used: Seeds

Medicinal Uses

Apium graveolens is traditionally used in Ayurveda for its medicinal properties. They help relieve bloating, gas, and indigestion while stimulating appetite and promoting healthy digestion. Ajmoda seeds also exhibit diuretic and mild laxative effects, supporting kidney and urinary health. Rich in essential oils, flavonoids, and antioxidants, they help reduce inflammation, support metabolic function, and enhance overall wellness. In traditional practice, Ajmoda is also used to support joint health, manage colicky abdominal discomfort, and balance aggravated Vata and Kapha doshas when used in appropriate formulations under professional guidance.
