

Product Information

Akarkara

Akarkara is a hardy perennial herb native to North Africa and the Mediterranean, also cultivated in India. It grows in dry, rocky soils with spreading stems and finely divided, feathery leaves, producing small, daisy-like flowers with yellow centers and white petals. Its thick, brownish roots are the most valued part, used in Ayurvedic and Unani formulations to stimulate the nervous system, enhance vitality, and support oral health.

Anacyclus pyrethrum

Pellitory

Active Ingredients

Dry Powder Extract

Active: -
Ratio: 7:1

Soft Paste Extract

Active: -
Ratio: 4:1

Part Used: Rhizome

Medicinal Uses

Anacyclus pyrethrum is a potent herb traditionally used for its nerve-stimulating, rejuvenating, and aphrodisiac properties. It is primarily valued for enhancing vitality, improving sexual health, boosting immunity, and strengthening the nervous system. Medicinally, Akarkara is used to treat sexual disorders like infertility and premature ejaculation, as well as to relieve dental pain, facial palsy, and speech issues due to its powerful nervine action. Its therapeutic benefits include acting as a natural aphrodisiac, promoting better cognitive function, stimulating the immune system, reducing inflammation, and providing analgesic effects, making it a highly effective herb for overall vitality and wellness.
