

Product Information

Amba Haldi

Amba Haldi is a perennial rhizomatous herb belonging to the Zingiberaceae family. It is widely cultivated in India and other tropical regions. The plant resembles turmeric in appearance, with lance-shaped green leaves and underground rhizomes that emit a characteristic raw mango aroma. The rhizomes are the primary medicinal part and are harvested after maturity. *Curcuma amada* thrives in warm, humid climates with well-drained, fertile soils.

Curcuma amada

Mango Ginger

Active Ingredients

Dry Powder Extract

Active: -

Ratio: 10:1

Soft Paste Extract

Active: -

Ratio: 7:1

Part Used: Rhizome

Medicinal Uses

Curcuma amada is traditionally used in Ayurveda for its digestive, anti-inflammatory, and carminative properties. It helps improve digestion, reduce bloating, and relieve abdominal discomfort. The herb also exhibits antioxidant, antimicrobial, and analgesic effects, supporting immunity, skin health, and wound healing. Rich in bioactive compounds and essential oils, Amba Haldi is beneficial in managing inflammation, enhancing metabolism, and promoting overall wellness, making it valuable in herbal and cosmetic formulations.
