

Product Information

Anantmool (Sariva)

Anantmool (Sariva) is a slender, climbing shrub native to the Indian subcontinent, with long, narrow leaves and small, pale yellowish or white flowers. It grows in tropical and subtropical regions and is known for its sweet-smelling, aromatic root. Found in dry, open, and forested areas, it is cultivated for its medicinal properties. The roots have a smooth, white or cream-colored appearance and are widely used in Ayurvedic practice.

Hemidesmus indicus

Indian Sarsaparilla

Active Ingredients

Dry Powder Extract

Active: 2% Saponins
Ratio: 7:1

Soft Paste Extract

Active: 1% Saponins
Ratio: 5:1

Part Used: Leaves

Medicinal Uses

It is widely revered in Ayurveda for its cooling, detoxifying, and blood-purifying properties. It is commonly used to treat various skin ailments, including rashes, eczema, and acne, due to its anti-inflammatory and antibacterial effects. Additionally, Anantmool is believed to have diuretic properties that support kidney function and help in detoxification by promoting urination. It is also used as a natural remedy for fevers, digestive issues, and respiratory problems such as asthma and bronchitis. The roots are often consumed in the form of decoctions, powders, or in combination with other herbs to support overall wellness. Its ability to balance the body's pH and improve circulation further enhances its medicinal reputation.
