

Product Information

Anar Chhilka, Dadim

Anar chhilka, Dadim is the outer rind of the pomegranate fruit. The pomegranate is a small deciduous tree native to the Mediterranean region, widely cultivated across India, producing round, red fruits with thick, leathery skin and juicy seeds. The peel is rich in bioactive compounds giving it notable medicinal value, with a slightly bitter and astringent taste. It is commonly used in powdered or extract form in traditional medicine.

Punica granatum

Pomegranate

Active Ingredients

Dry Powder Extract

Active: -
Ratio: 5:1

Soft Paste Extract

Active: -
Ratio: 4:1

Part Used: Fruit Pericarp

Medicinal Uses

Punica granatum is highly valued in Ayurveda for its astringent, antioxidant, and antimicrobial properties. It helps in managing digestive issues such as diarrhoea, dysentery, and intestinal parasites due to its natural astringency. The peel is also used to support heart health, regulate blood sugar, and improve skin health, thanks to its rich content of polyphenols, tannins, and flavonoids. Additionally, it exhibits anti-inflammatory effects, aids in wound healing, and strengthens immunity, making it a versatile component in herbal formulations.

Purity: 100%
Shelf Life: 36 Months
