

Product Information

Babchi

Babchi is an annual herb of the Fabaceae family, native to India and cultivated in tropical and subtropical regions. The plant grows up to 1 meter with erect, branched stems, trifoliate leaves, and small white or purple flowers. The seeds small, dark brown to black are highly valued medicinally. They contain a rich concentration of bioactive compounds including psoralein, which is responsible for many of their therapeutic effects.

Psoralea corylifolia

Psoralea Seed, Bakuchi

Active Ingredients

Dry Powder Extract

Active: -
Ratio: 10:1

Soft Paste Extract

Active: -
Ratio: 7:1

Part Used: Seeds

Medicinal Uses

Psoralea corylifolia is traditionally used in Ayurveda for its medicinal properties. They are traditionally used to manage skin disorders such as vitiligo, psoriasis, and eczema due to their ability to stimulate pigmentation and promote skin health. Additionally, Babchi seeds support bone health, enhance reproductive function, and boost overall immunity. Rich in flavonoids, coumarins, and essential oils, they are also used in formulations for digestive support, respiratory health, and as a natural tonic to improve vitality and well-being.
