

Product Information

Bael, Bilwa

Bael, Bilwa is a deciduous tree native to India and Southeast Asia that can grow up to 12 meters tall. It features a woody trunk with spines and produces hard yellow fruits valued for their medicinal properties. The tree holds significant religious importance in India; its various parts have been extensively used in traditional medicine for gastrointestinal disorders among other therapeutic applications.

Aegle marmelos

Bael Fruit, Bengal Quince

Active Ingredients

Dry Powder Extract

Active: -
Ratio: 4:1

Soft Paste Extract

Active: -
Ratio: 2:1

Part Used: Fruit

Medicinal Uses

Aegle marmelos is an Ayurvedic herbal medicine with manifold medicinal and pharmacological properties. Well known for its gastrointestinal action and antimicrobial effect, Bael is used for diarrhea, dysentery, and indigestion. Pulp, rich in tannins and mucilage, protects the gastrointestinal tract, decreases the inflammatory process, and hardens the stomach. Normalizing bowel movements and relieving constipation, Bael regulates digestion at its best. While helping to regulate blood sugar levels, its anti-diabetic properties, liver protection, and immune system boosting contribute to one's general well-being. Moreover, antioxidant properties of Bael fight against oxidative stress, further increasing its therapeutic value.
