Dry Powder Extract

Active: 1% Bitters
Ratio: 8:1

Soft Paste Extract

Active: 0.5% Bitters
Ratio: 6:1

Part Used: Whole plant

LET'S CONNECT

Medicinal Uses

Phyllanthus niruri is a versatile herb traditionally used in medicine. Renowned for its hepatoprotective properties, it effectively detoxifies the liver and reduces inflammation within the organ. This makes it a valuable remedy for diseases such as jaundice, hepatitis, and gallbladder stones. Besides the liver, Bhumi Amla has other medicinal benefits. It aids in digestion, manages viral infection, and promotes kidney health by helping to eliminate kidney stones and urinary tract infections. Its antioxidant properties fight against oxidative stress and hence are useful in the formulation for skin disorders and diabetes management.

Purity: 100%
Shelf Life: 36 Months
