

Product Information

Gajar Beej

Gajar Beej is a biennial herb of the Apiaceae family, widely cultivated in India and temperate regions. The plant has finely divided, feathery leaves, small white flowers in umbels, and slender, tapering roots. Its seeds are aromatic and rich in essential oils, making them valuable in both culinary and medicinal applications. *Daucus carota* thrives in well-drained, fertile soils under full sunlight.

Daucus carota

Carrot Seeds

Active Ingredients

Dry Powder Extract

Active: -
Ratio: 8:1

Soft Paste Extract

Active: -
Ratio: 5:1

Part Used: Seeds

Medicinal Uses

Daucus carota is traditionally used in Ayurveda for its digestive, carminative, and diuretic properties. The seeds help relieve indigestion, gas, and bloating, and support urinary and reproductive health. They also exhibit antioxidant, antimicrobial, and anti-inflammatory effects, promoting overall wellness and vitality. Rich in essential oils, flavonoids, and nutrients, Gajar Beej aids in metabolism, detoxification, and reproductive health, making it a valuable ingredient in herbal and medicinal formulations.
