

## Product Information

### Indrayan Mool

Indrayan Mool is a herbaceous plant of the Cucurbitaceae family, found in dry and arid regions of India, Africa, and the Middle East. It features a trailing vine with deeply lobed leaves, small yellow flowers, and a spherical fruit resembling a miniature watermelon, green when unripe and yellow when mature. The plant thrives in hot, dry, sandy soils. Its roots are the most valuable part, used in traditional medicinal practices.

### Citrullus colocynthis

Colocynth

#### Active Ingredients

##### Dry Powder Extract

Active: -  
Ratio: 7:1

##### Soft Paste Extract

Active: -  
Ratio: 5:1

Part Used: Root

#### Medicinal Uses

Citrullus colocynthis is traditionally used in Ayurveda for its medicinal properties. The root of the plant is the key therapeutic part, known for its natural purgative, anti-inflammatory, and analgesic effects. It is often used to treat digestive disorders, such as constipation and indigestion, due to its strong laxative properties. Indrayan Mool is also utilized in Ayurvedic medicine to support liver health and detoxification processes. The plant is believed to have anti-cancer properties, and it is sometimes used in the treatment of malaria and fever. Additionally, the root is used for its antimicrobial and analgesic benefits in treating joint pain and arthritis. However, due to its potency, it should be used with caution and under expert supervision.

Purity: 100%
