

Product Information

Kali Mirch

Kali Mirch is an evergreen, perennial climbing vine of the Piperaceae family, native to South India and widely cultivated in tropical regions. The plant has heart-shaped leaves, small white flowers, and produces small, round berry-like fruits dried to become black pepper. Known for its pungent, spicy flavor, black pepper is one of the world's most widely used spices and has been used in traditional medicine for centuries.

Piper nigrum

Black Pepper

Active Ingredients

Dry Powder Extract

Active: 5% Piperine
Ratio: 10:1

Soft Paste Extract

Active: 3% Piperine
Ratio: 7:1

Part Used: Fruit

Medicinal Uses

Piper nigrum is a spice generally used in the kitchen for their medicinal values. It is well recognized for its digestive, antioxidant, and anti-microbial properties. Kali Mirch increases the secretion of digestive enzymes, hence promoting digestion and absorption. It acts as a natural expectorant and is efficient in treating respiratory disorders like cough and cold. It exerts protective mechanisms on the cells against oxidative damage, improving immunity. Importantly, this improves the bioavailability of curcumin, the main active ingredient in turmeric. Black pepper also mediates body weight by promoting an increase in metabolism and the oxidation of fatty acids.

Purity: 100%
Shelf Life: 36 Months
Size: 1kg, 5kg, 25kg
Country of Origin: India
