

## Product Information

### Kalonji

Kalonji is an annual flowering herb of the Ranunculaceae family, native to South and Southwest Asia. The plant has finely divided, feathery leaves and delicate blue or white flowers that develop into fruit capsules containing small, angular, matte-black seeds. These seeds are aromatic with a slightly bitter, peppery taste. Kalonji seeds are widely used in culinary applications and traditional medicine.

### Nigella Sativa

Black Seed, Nigella Seed

#### Active Ingredients

##### Dry Powder Extract

Active: -

Ratio: 10:1

##### Soft Paste Extract

Active: -

Ratio: 7:1

Part Used: Seeds

#### Medicinal Uses

Nigella Sativa is an extremely versatile herb rooted in traditional medication. Known for strong anti-inflammatory, antioxidant, and immunity-enhancing properties, the major health benefits of kalonji seeds are enormous. They support normal body weight by supporting healthy digestion and maintaining appropriate sugar levels in the blood. Antioxidant-rich compounds protect cells against cellular oxidative damage, fortifying your immune system. Traditionally, Kalonji is used in curing respiratory problems like asthma and bronchitis. It reduces cholesterol, improves blood flow, and thus is beneficial for the heart. Its nourishing effects are good for hair and skin, reducing hair fall and imparting a glow to the skin.

Purity: 100%
