

Product Information

Kasni Beej

Kasni Beej is a hardy perennial of the Asteraceae family, growing up to 1-1.5 meters with bright blue to lavender flowers, a deep taproot, and a rigid, branching stem. Its leaves resemble dandelions—lance-shaped, toothed, and slightly hairy. *Cichorium intybus* is native to Europe and widely naturalized across Asia, North Africa, and North America, thriving in temperate climates and often found along roadsides and in meadows.

Cichorium intybus

Chicory

Active Ingredients

Dry Powder Extract

Active: 1% Bitters
Ratio: 10:1

Soft Paste Extract

Active: 0.5% Bitters
Ratio: 7:1

Part Used: Seeds

Medicinal Uses

Cichorium intybus is traditionally used in Ayurveda for its medicinal properties. They are known to be effective in managing liver disorders such as jaundice and hepatitis by promoting bile secretion and improving liver function. Kasni Beej also has mild diuretic properties, aiding in the elimination of toxins through urine. Additionally, it is used to manage digestive issues like constipation and loss of appetite. The seeds are believed to have anti-inflammatory, antioxidant, and blood-purifying effects, making them beneficial in conditions related to skin, metabolism, and overall immune health.

Purity: 100%
