

Product Information

Khajur

Khajur is an evergreen tree of the Arecaceae family, widely cultivated in arid and semi-arid regions. Growing up to 20-25 meters, it has a sturdy trunk topped with large feather-like fronds and clusters of oblong, sweet fruits called dates, prized for their rich taste and nutritional value. Adapted to dry climates, the date palm is one of the oldest cultivated fruit trees and holds great economic and cultural importance.

Phoenix dactylifera

Date Palm

Active Ingredients

Dry Powder Extract

Active: -
Ratio: 3:1

Soft Paste Extract

Active: -
Ratio: 2:1

Part Used: Fruit

Medicinal Uses

Phoenix dactylifera is well-regarded for its nourishing and strengthening qualities in traditional medicine. Dates are abundant in natural sugars, fiber, vitamins, and minerals, making them an excellent source of quick energy and digestive support. They also exhibit antioxidant and anti-inflammatory properties that contribute to heart health and stronger immunity. In Ayurveda and folk remedies, Khajur is used for managing fatigue, anemia, and respiratory issues, while also enhancing reproductive health and overall vitality.
