

Product Information

Makoi Dana, Kakmachi

Makoi Dana, Kakmachi is a small, herbaceous plant of the Solanaceae family, growing up to 30-120 cm in moist, fertile tropical and subtropical soil. It has soft, ovate leaves with wavy edges and small, white or pale violet star-shaped flowers, followed by round berries that turn from green to glossy black when ripe. The seeds from ripe berries are known as Makoi Dana. *Solanum nigrum* is widely used in traditional Ayurvedic formulations.

Solanum nigrum

Black Nightshade, European Black Nightshade, Blackberry Nightshade

Active Ingredients

Dry Powder Extract

Active: -
Ratio: 7:1

Soft Paste Extract

Active: -
Ratio: 5:1

Part Used: Whole plant

Medicinal Uses

Solanum nigrum is traditionally used in Ayurveda for its medicinal properties. The seeds and the whole plant are known for their hepatoprotective, anti-inflammatory, and antioxidant effects. They are commonly used in formulations that support liver health, aid in detoxification, and relieve conditions like jaundice, hepatitis, and skin disorders. Makoi is also beneficial in managing digestive issues, reducing pain and inflammation in conditions like rheumatism, and promoting overall immunity. Its natural cooling effect makes it helpful in reducing body heat and soothing urinary tract infections.

Purity: 100%
Shelf Life: 36 Months
Size: 1kg, 5kg, 25kg
Country of Origin: India
