

Product Information

Moulsiri Chaal

Moulsiri Chaal is an evergreen tree of the Sapotaceae family, native to India and Southeast Asia, often cultivated in gardens and avenues for its dense foliage and fragrant flowers. The tree grows up to 15-20 meters tall, with dark green glossy leaves, small star-shaped white blossoms, and orange-red berry-like fruits. Its bark (chhal) is the most valued part in traditional medicine, prized for its therapeutic properties.

Mimusops elengi

Spanish Cherry Bark

Active Ingredients

Dry Powder Extract

Active: -
Ratio: 7:1

Soft Paste Extract

Active: -
Ratio: 5:1

Part Used: Bark

Medicinal Uses

Mimusops elengi is highly regarded in Ayurveda for its astringent, cooling, and restorative properties. The bark is traditionally used to strengthen gums, relieve toothache, and treat oral disorders. It is also beneficial in managing fever, diarrhea, and excessive thirst due to its cooling and soothing effects. With antimicrobial and anti-inflammatory qualities, Moulsiri supports skin health, wound healing, and overall well-being, making it an important herb in classical Ayurvedic formulations.
