

Product Information

Nirgundi, Sambhalu

Nirgundi, Sambhalu is a hardy, aromatic shrub of the Verbenaceae family, growing in tropical and subtropical regions near riverbanks and roadsides throughout India. The plant has compound leaves with five pointed leaflets dark green above and silvery underneath and produces clusters of small bluish-purple flowers. It emits a strong aroma that repels insects and is drought-tolerant, thriving even in poor soil.

Vitex negundo

Five-leaved Chaste Tree

Active Ingredients

Dry Powder Extract

Active: 2% Bitters, 1% Alkaloids
Ratio: 8:1

Soft Paste Extract

Active: 1% Bitters, 0.5% Alkaloids
Ratio: 5:1

Part Used: Whole plant

Medicinal Uses

Vitex negundo is traditionally used in Ayurveda for its medicinal properties. Known for their anti-inflammatory, pain-relieving, and antioxidant effects, they are commonly used to ease joint pain, arthritis, and muscle aches often applied as pastes or in medicated oils. Nirgundi leaves are also beneficial in managing respiratory problems like asthma and bronchitis, thanks to their natural ability to clear airways and reduce inflammation. In addition, they support faster wound healing, reduce swelling, and help relieve headaches and menstrual pain. Their antimicrobial qualities also make them effective in treating skin conditions and promoting clear, healthy skin.

Purity: 100%
