

Product Information

Nisoeth (Trivat), Pithori

Nisoeth (Trivat), Pithori is a perennial herb of the Convolvulaceae family, native to the Indian subcontinent, found in India, Nepal, and Sri Lanka. It grows in tropical and subtropical rocky climates with long, trailing stems and broad, ovate leaves. The funnel-shaped flowers are white or pale purple, blooming in clusters. The thick, tuberous roots are the primary medicinal part, known for their pungent aroma and therapeutic properties.

Operculum turpethum

Turpeth, Indian Jalap

Active Ingredients

Dry Powder Extract

Active: -
Ratio: 5:1

Soft Paste Extract

Active: -
Ratio: 3:1

Part Used: Root

Medicinal Uses

Operculum turpethum (Nisoeth (Trivat), Pithori) is highly valued in Ayurvedic and traditional medicine due to its wide range of medicinal benefits. It is known for its potent purgative and detoxifying effects, making it an effective remedy for constipation, digestive disorders, and liver ailments. The root of Nishot is often used to stimulate bowel movements and cleanse the gastrointestinal system. It also has anti-inflammatory and analgesic properties, which help in managing joint pain, rheumatism, and inflammatory conditions. Additionally, Nishot is used in the treatment of skin conditions like eczema and psoriasis, as it has soothing and healing properties. Its diuretic effects also support kidney health and help flush out toxins from the body.
