

Product Information

Varun Chhal

Varun Chhal is a deciduous tree of the Capparaceae family, native to the Indian subcontinent, found along riverbanks and forest edges. Growing 10-15 meters with a spreading crown, it has large, ovate, deeply lobed leaves and small, white to pale yellow flowers in clusters. Its fruit is a large, round capsule with numerous seeds. The bark, especially the outer layer, is the primary therapeutic part, used in traditional healing practices.

Crataeva nurvala

Three-leaved Caper

Active Ingredients

Dry Powder Extract

Active: -
Ratio: 8:1

Soft Paste Extract

Active: -
Ratio: 5:1

Part Used: Bark

Medicinal Uses

Crataeva nurvala is highly esteemed in Ayurvedic medicine for its numerous therapeutic properties. The bark of the tree is particularly known for its diuretic, anti-inflammatory, and antimicrobial effects. It is widely used to treat urinary tract infections, kidney stones, and other kidney-related ailments by promoting the elimination of toxins and supporting overall kidney function. Varun Chhal is also beneficial in managing conditions like dysuria (painful urination), gout, and arthritis due to its ability to reduce inflammation and pain. Additionally, it has been used in traditional medicine to support digestion and improve liver health. The bark is often included in herbal formulations to strengthen the urinary system and detoxify the body.
