

Product Information

Vijaysar

Vijaysar is a large tree native to India, commonly found in dry and tropical regions. It is known for its reddish-brown bark and small, yellowish flowers. In traditional medicine, Vijaysar is highly valued for its blood sugar-lowering properties, making it particularly useful for managing diabetes. The tree's bark and heartwood are used in herbal formulations to support liver health, promote weight loss, and improve digestion.

Pterocarpus marsupium

Indian Kino Tree

Active Ingredients

Dry Powder Extract

Active: 0.3% Alkaloids, 15% Tannins
Ratio: 8:1

Soft Paste Extract

Active: 0.2% Alkaloids, 10% Tannins
Ratio: 5:1

Part Used: Heartwood

Medicinal Uses

Pterocarpus marsupium is a medicinal tree widely used in Ayurvedic medicine for its health-promoting properties. Known for its anti-diabetic, anti-inflammatory, and antioxidant effects, Vijaysar is most commonly used to manage diabetes by helping regulate blood sugar levels and improving insulin sensitivity. The bark of the tree is traditionally used to support digestive health, treating conditions like indigestion, constipation, and diarrhea. Additionally, Vijaysar is believed to have healing properties for skin conditions, such as wounds and infections, and is used to improve heart health by reducing cholesterol levels. It is also considered beneficial for detoxifying the body and boosting immunity.

Purity: 100%
