

Product Information

Karanja

Karanja (*Pongamia pinnata*) is a medium-sized tree belonging to the Fabaceae family and is commonly found in tropical and subtropical areas. It has a wide-spreading crown, glossy green compound leaves, and clusters of light pink to white flowers. The tree produces flat pods containing one or two seeds.

Pongamia glabra

Smooth leaved pongamia

Active Ingredients

Dry Powder Extract

Active: 1% Bitters
Ratio: 6:1

Soft Paste Extract

Active: 0.5% Bitters
Ratio: 4:1

Part Used: Seeds

Medicinal Uses

Karanja has been traditionally used in Ayurveda for its antimicrobial and anti-inflammatory properties. Its seeds, leaves, bark, and oil are commonly used in traditional preparations for skin problems, itching, wounds, and inflammation. Karanja oil is mainly used externally to help maintain healthy and nourished skin. It is also traditionally valued for its cleansing and soothing properties, making it useful in various herbal and personal-care formulations. The plant is widely recognized in traditional practices for supporting healthy skin and maintaining its natural protective barrier.
