

Product Information

Majuphal

Majuphal (*Quercus infectoria*) is a small to medium-sized tree belonging to the Fagaceae family. The plant is best known for its hard, rounded galls, which develop on the branches due to insect activity. These galls are rich in tannins and are the main part traditionally collected and used for medicinal purposes.

Quercus infectoria

Oak Gall

Active Ingredients

Dry Powder Extract

Active: -
Ratio: 4:1

Soft Paste Extract

Active: -
Ratio: 3:1

Part Used: Fruit

Medicinal Uses

Majuphal is traditionally used in Ayurveda for its astringent and antimicrobial properties. It is commonly included in traditional preparations for oral and gum care, minor skin problems, and conditions involving excessive discharge. Its high tannin content also makes it useful in preparations that support healthy skin and tissue. It is also traditionally valued for its soothing and cleansing properties, particularly in herbal formulations for skin and oral care. Majuphal is widely used in traditional practices to help maintain healthy tissues and overall hygiene.

Purity: 100%
