Product Information

Suranjan

Suranjan (Colchicum luteum) is a small perennial herb belonging to the Colchicaceae family. It grows from an underground corm and has narrow, lance-shaped leaves with bright yellow, crocus-like flowers. The plant is mainly found in mountainous regions, and its underground parts are traditionally used for medicinal purposes.

Cochicum luteum

Meadow Saffron

Active Ingredients

Dry Powder Extract

Active: -

Ratio: 7:1

Soft Paste Extract

Active: -

Ratio: 4:1

Part Used: Seeds

Medicinal Uses

Suranjan is traditionally used to support joint health and relieve pain, swelling, and stiffness. It has been particularly valued in traditional medicine for managing gout and other inflammatory joint conditions. Due to the presence of colchicine-related compounds, it should be used carefully and only in properly prepared formulations. It is traditionally valued for its anti-inflammatory and soothing properties in herbal preparations. Proper processing and appropriate formulation are important when using Suranjan to ensure its safe and intended use.
