

Product Information

Talispatra

Talispatra (*Abies webbiana*) is a tall, evergreen conifer belonging to the Pinaceae family and is mainly found in the Himalayan region. It has a straight trunk, dense branches, and flat, needle-like leaves with a pleasant aroma. The leaves are the main part of the plant traditionally used in herbal preparations.

Himalayan Silver Fir

Active Ingredients

Dry Powder Extract

Active: -

Ratio: 8:1

Soft Paste Extract

Active: -

Ratio: 5:1

Part Used: Leaves

Medicinal Uses

Talispatra is traditionally used for its aromatic and respiratory-supporting properties. Its leaves are commonly included in traditional preparations to help soothe cough, throat irritation, and respiratory congestion. They are also traditionally used to support digestion and provide a warming and soothing effect. The leaves are also valued for their natural aromatic compounds and are commonly used in herbal formulations for respiratory comfort. Talispotra is traditionally appreciated for its soothing qualities and its role in supporting overall respiratory and digestive wellness.
