

Product Information

Vilaiti Imli

Vilaiti Imli (*Garcinia cambogia*) is a small evergreen tree from the Clusiaceae family. It has glossy green leaves and produces small, greenish-yellow to reddish fruits with a rounded shape and prominent grooves. The fruit rind is the primary part used in traditional preparations and is known to contain hydroxycitric acid (HCA).

Garcinia cambogia

Malabar Tamarind

Active Ingredients

Dry Powder Extract

Active: 50% Hydroxycitric Acid (HCA)
Ratio: 5:1

Soft Paste Extract

Active: -
Ratio: -

Part Used: Fruit

Medicinal Uses

Vilaiti Imli is traditionally used for digestive and metabolic support. Its fruit rind is commonly included in herbal preparations to support digestion and appetite and is also used in traditional weight-management formulations. The presence of organic acids and other natural compounds contributes to its traditional therapeutic value. It is also traditionally valued for its astringent and antioxidant properties, which make it useful in various herbal formulations. Vilaiti Imli is commonly appreciated for supporting digestive balance and overall metabolic wellness.
