

## GENERAL INFORMATION

NODEX is a compact outdoor bollard luminaire defined by its sharp geometric form and offset light aperture, creating a strong architectural character with a minimal footprint. The solid aluminum body and precise cut-out detail emphasize clarity of form while ensuring durability in exterior environments. Designed to deliver controlled, downward illumination with a symmetrical Type V distribution, NODEX is ideal for pathways, entrances, and landscape applications where visual guidance, glare control, and a distinct contemporary presence are required.
