

## GENERAL INFORMATION

The FELTIS is an acoustic ring pendant developed to balance high-efficiency lighting with elevated spatial comfort. Its generous circular profile combines a sculpted aluminum frame with a full-depth PET felt body, delivering meaningful sound absorption while providing layered up- and down-light for balanced ambient illumination. Tailored for contemporary hospitality, workplace, and education environments, FELTIS is available in multiple diameters, outputs, distributions, and acoustic/metal finish combinations—allowing it to become a quiet yet expressive statement piece in projects that demand both visual refinement and acoustic performance.
