

GENERAL INFORMATION

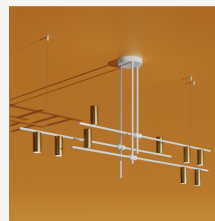

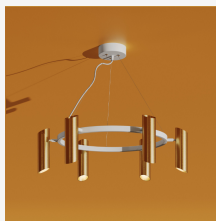

CONSTRUCTIO is a sculptural linear pendant defined by its precise geometry and refined metal composition. Suspended from a central stem, the horizontal structure supports cylindrical light elements that create a balanced rhythm of form and illumination. The fixture delivers both upward and downward light, enhancing the surrounding architecture while adding depth and atmosphere to the space. With its minimalist structure and timeless brass finish, CONSTRUCTIO becomes a striking yet elegant centerpiece for dining areas, hospitality interiors, and contemporary residential environments.
