Day of use

Stone & Steel Scrub Water Line

Gently scrub the interior surfaces, focusing on areas where dirt or residue may accumulate

- 1. Make sure the brush is fully charged
- 2. Don't push too hard on the brush

Water Overflow

- 1. Ensure main water source is turned on
- 2. Open the stainless steel fill valve with the green label (pull and rotate)
- 3. Fill the tub until water slightly overflows
- 4. Close the stainless steel valve with the green mark

Water Oxidize

At the end of each day the unit is used, scatter a scoop of fresh and clear on the water

Cold - stir and dissolve in a pitcher before adding to water

Weekly

Stone & Steel Vacuum Inside

Vacuum debris from the floor of the tub and seats

Wood Scrub Inside

Scrub the walls, seats, and floor of the tub

Water Pump Basket

Pump basket procedure*

Make sure the basket and o-ring is seated properly

Water Pressure Checks

Write down the PSI before and after backwashing

Water Backwash

Backwash procedure* *

Water Overflow, test & balance water

- 1. Ensure main water source is turned on
- 2. Open the stainless steel fill valve with the green mark (pull and rotate)
- 3. Fill the tub until water slightly overflows.
- 4. Close the Stainless Steel Valve with the green mark
- 5. Dip and swirl the Test strip in the water for 2 seconds
- 6. Balance the water according to chemical instructions

Water Oxidize

At the end of each day the unit is used, scatter a scoop of fresh and clear on the water

Cold - stir and dissolve in a pitcher before adding to water

Water Mineralize

- 1. Do your usual weekly tasks
- 2. Dose the water with Nordsprings Mineral Essence

And we recommend doing a ceremony to share with people

Tips

Pump basket procedure*

- 1. Turn off and unplug the pump
- 2. CLOSE the SUCTION valve with the BLACK label
- 3. CLOSE the RETURN valve with the WHITE label
- 4. Unscrew the cover of the pump basket with included BLACK handle ring
- 5. Empty and clean basket, basket seal o-ring, and ball
- 6. Re-seat and RETURN the blue basket back and o-ring
- 7. Put the ball back in the basket
- 8. Slightly OPEN the SUCTION valve with the BLACK label so the basket slightly overflows, then CLOSE SUCTION valve
- 9. Screw cover of pump basket back into place till firmly sealed
- 10. OPEN both SUCTION valve, BLACK label, and RETURN valve, WHITE label
- 11. Turn on and plug in the pump

Backwash procedure**

- **DO NOT CLOSE SUCTION valve, BLACK label, or RETURN valve, WHITE label prior to backwasing**
 - **DO NOT OPEN FILL valve, GREEN label, during backwash procedure**
- 1. Write down starting PSI number on care sheet while pump is running
 - 2. Turn off and unplug the pump. Set to BACKWASH Mode
 - 3. Turn on and plug in the pump. Run for minimum 30 seconds, until water runs crystal clear
 - 4. Turn off and unplug the pump. Set to RINSE Mode
 - 5. Turn on and plug in the pump. Run for minimum 20 seconds, until the water runs clear
 - 6. Turn off and unplug the pump. Set to FILTER Mode
 - 7. Turn on and plug in the pump
 - 8. Write down finishing PSI number on care sheet while pump is running
