

The perfect growing medium...
to grow your profits!

Source Coco Coir From the Leader

Gro-Med, a trusted global leader in producing & exporting eco-friendly coco coir substrates. Serving growers worldwide from horticulture, floriculture to young plant growers & soil blenders

At our world-class production centers located in Pollachi, Dindigul & Salem, we turn coconut husks into premium coir substrates using our advanced machinery & infrastructure. Operated by skilled experts, our facilities ensure consistent quality & large-scale production capacity

Trusted by top crop producers in over 75+ Countries. We're committed to provide high quality sustainable soilless growing medium to grow crops that nourishes the world

We Pledge to Deliver the Best For your Plants & Planet

QC Inspections

- ✿ Every stage, from washing, drying to compressing & packaging, follows strict QC standards for consistent quality

Lab Testing

- ✿ Each batch of Coco Coir undergoes rigorous testing for EC, pH & moisture

Thorough Screening

- ✿ Our advanced destoner technology removes dust, stones & other impurities, providing a clean substrate ideal for horticulture

Track & Trace App

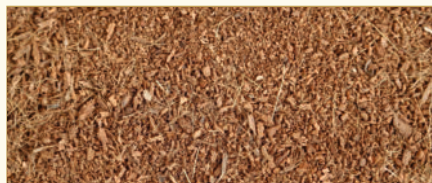

- ✿ Our app lets customers monitor quality checks, production stages & logistics for full transparency

CHOOSE YOUR BLEND

Gro-Med Guarantees consistency in each batch, delivering better yield & bigger profits for every grower, by offering tailored blends formulated by certified agronomists that allow you to adjust Water Holding Capacity (WHC) & Air-Filled Porosity (AFP) to precisely suit your cultivation needs.

Low EC Coir Un-sieved

Low EC Coir sieved

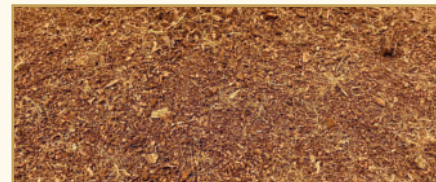

Low EC 100% Husk Chips

Low EC 70% Coco + 30% Husk Chips

Low EC 70% Coco + 30% Fibre

Perfect to Grow

Tomato

Cucumber
