

*for the best only*

## VIVATURF STATEMENT ON PFAS FREE

Dear valued customers:

In VIVATURF we have always upheld a steadfast commitment to sustainability and the responsible production of our products. This commitment extends to a meticulous focus on the material chemistry employed in our product lines, including those under the AGS Turf brand.

Among the many substances we scrutinize and prioritize, PFAS (Per- and polyfluoroalkyl substances) chemicals are of particular concern. We insist that our supply partners disclose any presence of PFAS chemicals in the raw materials, components, and finished goods procured by VIVATURF.

We are pleased to inform you that, based on the information made available by our suppliers to date, VIVATURF does not employ PFAS chemicals that are currently listed under California's Proposition 65 regulations or recognized as target analytes in USEPA Methods for PFAS analysis, specifically Methods 533, 537, 3827, and Draft Method 1633. This assurance applies to the manufacturing of components used in our turf products.

Our commitment to our customers extends beyond just compliance. We are dedicated to consistently enhancing the performance and material health profiles of VIVATURF products.

Should you have any inquiries or require further information, please do not hesitate to reach out to us at [info@vivaturf.com](mailto:info@vivaturf.com).

Sincerely,

Director of Research and Development  
Jiangsu VIVATURF Artificial Grass Co., Ltd.
