

Total Transport Pilots

Progress update for EEH Board July 2025

Background

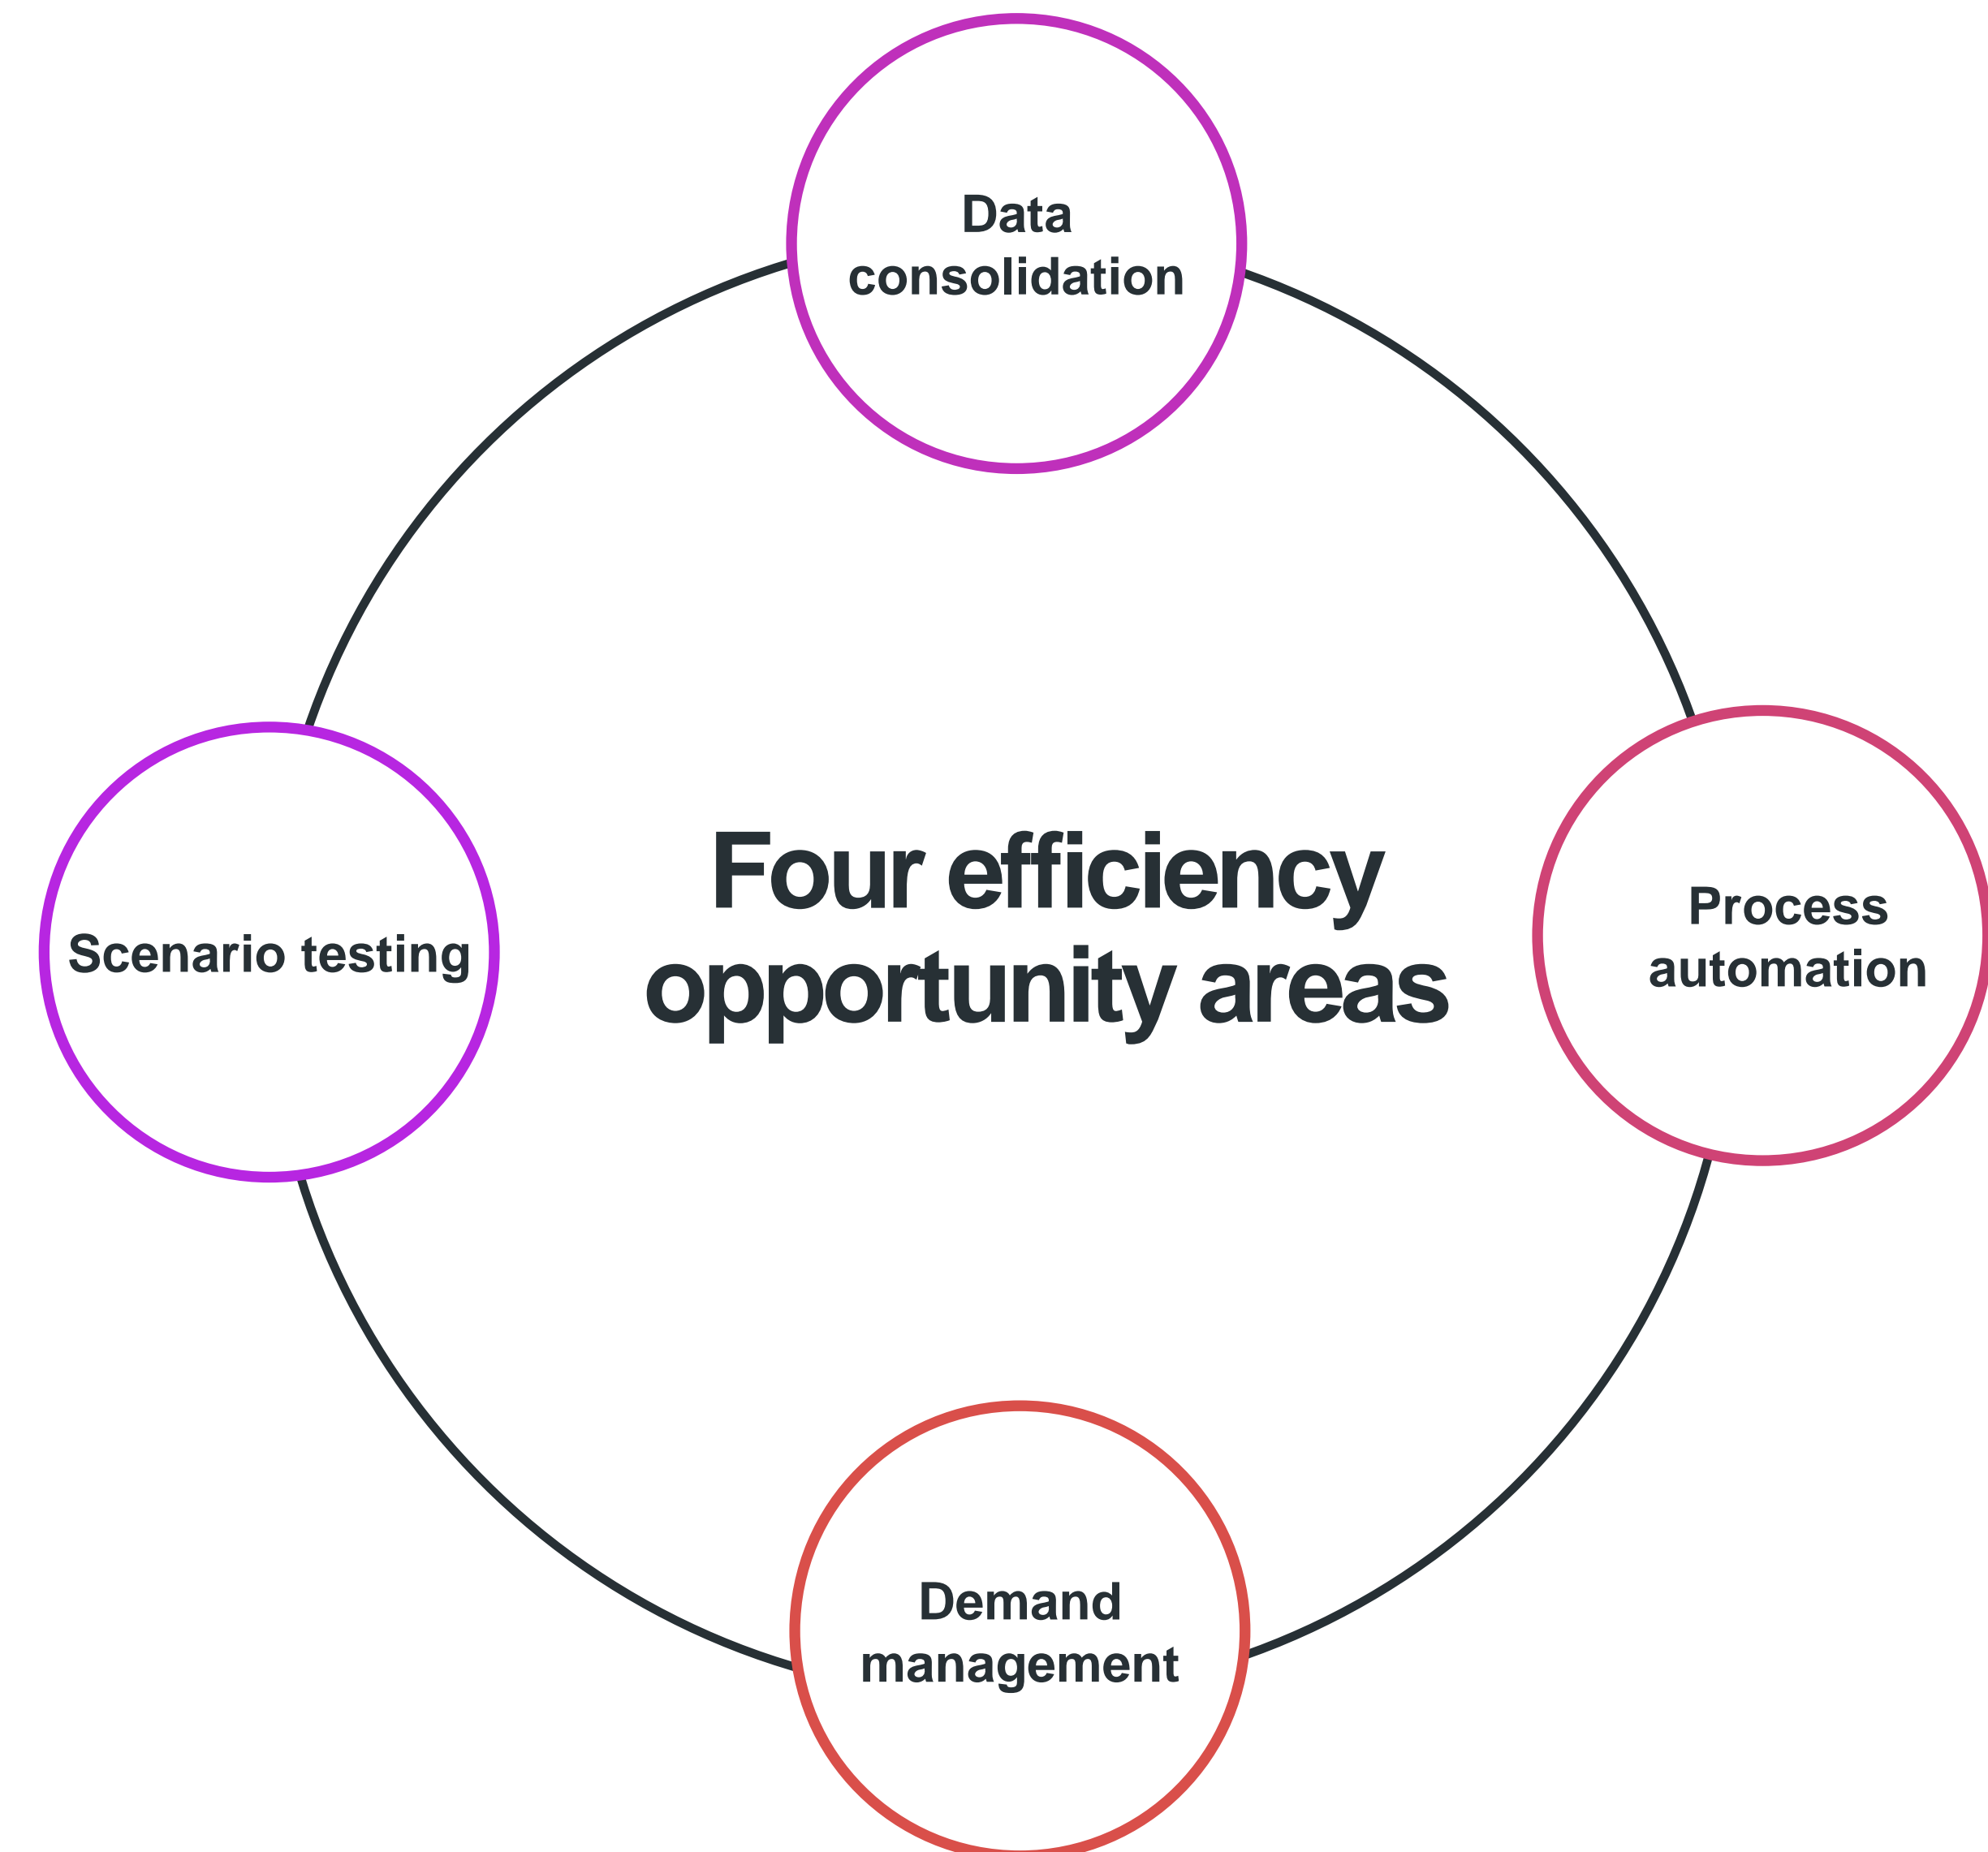

Better Futures demonstrated that Total Transport still presents an opportunity for transport efficiencies

The 4 focus areas identified were:

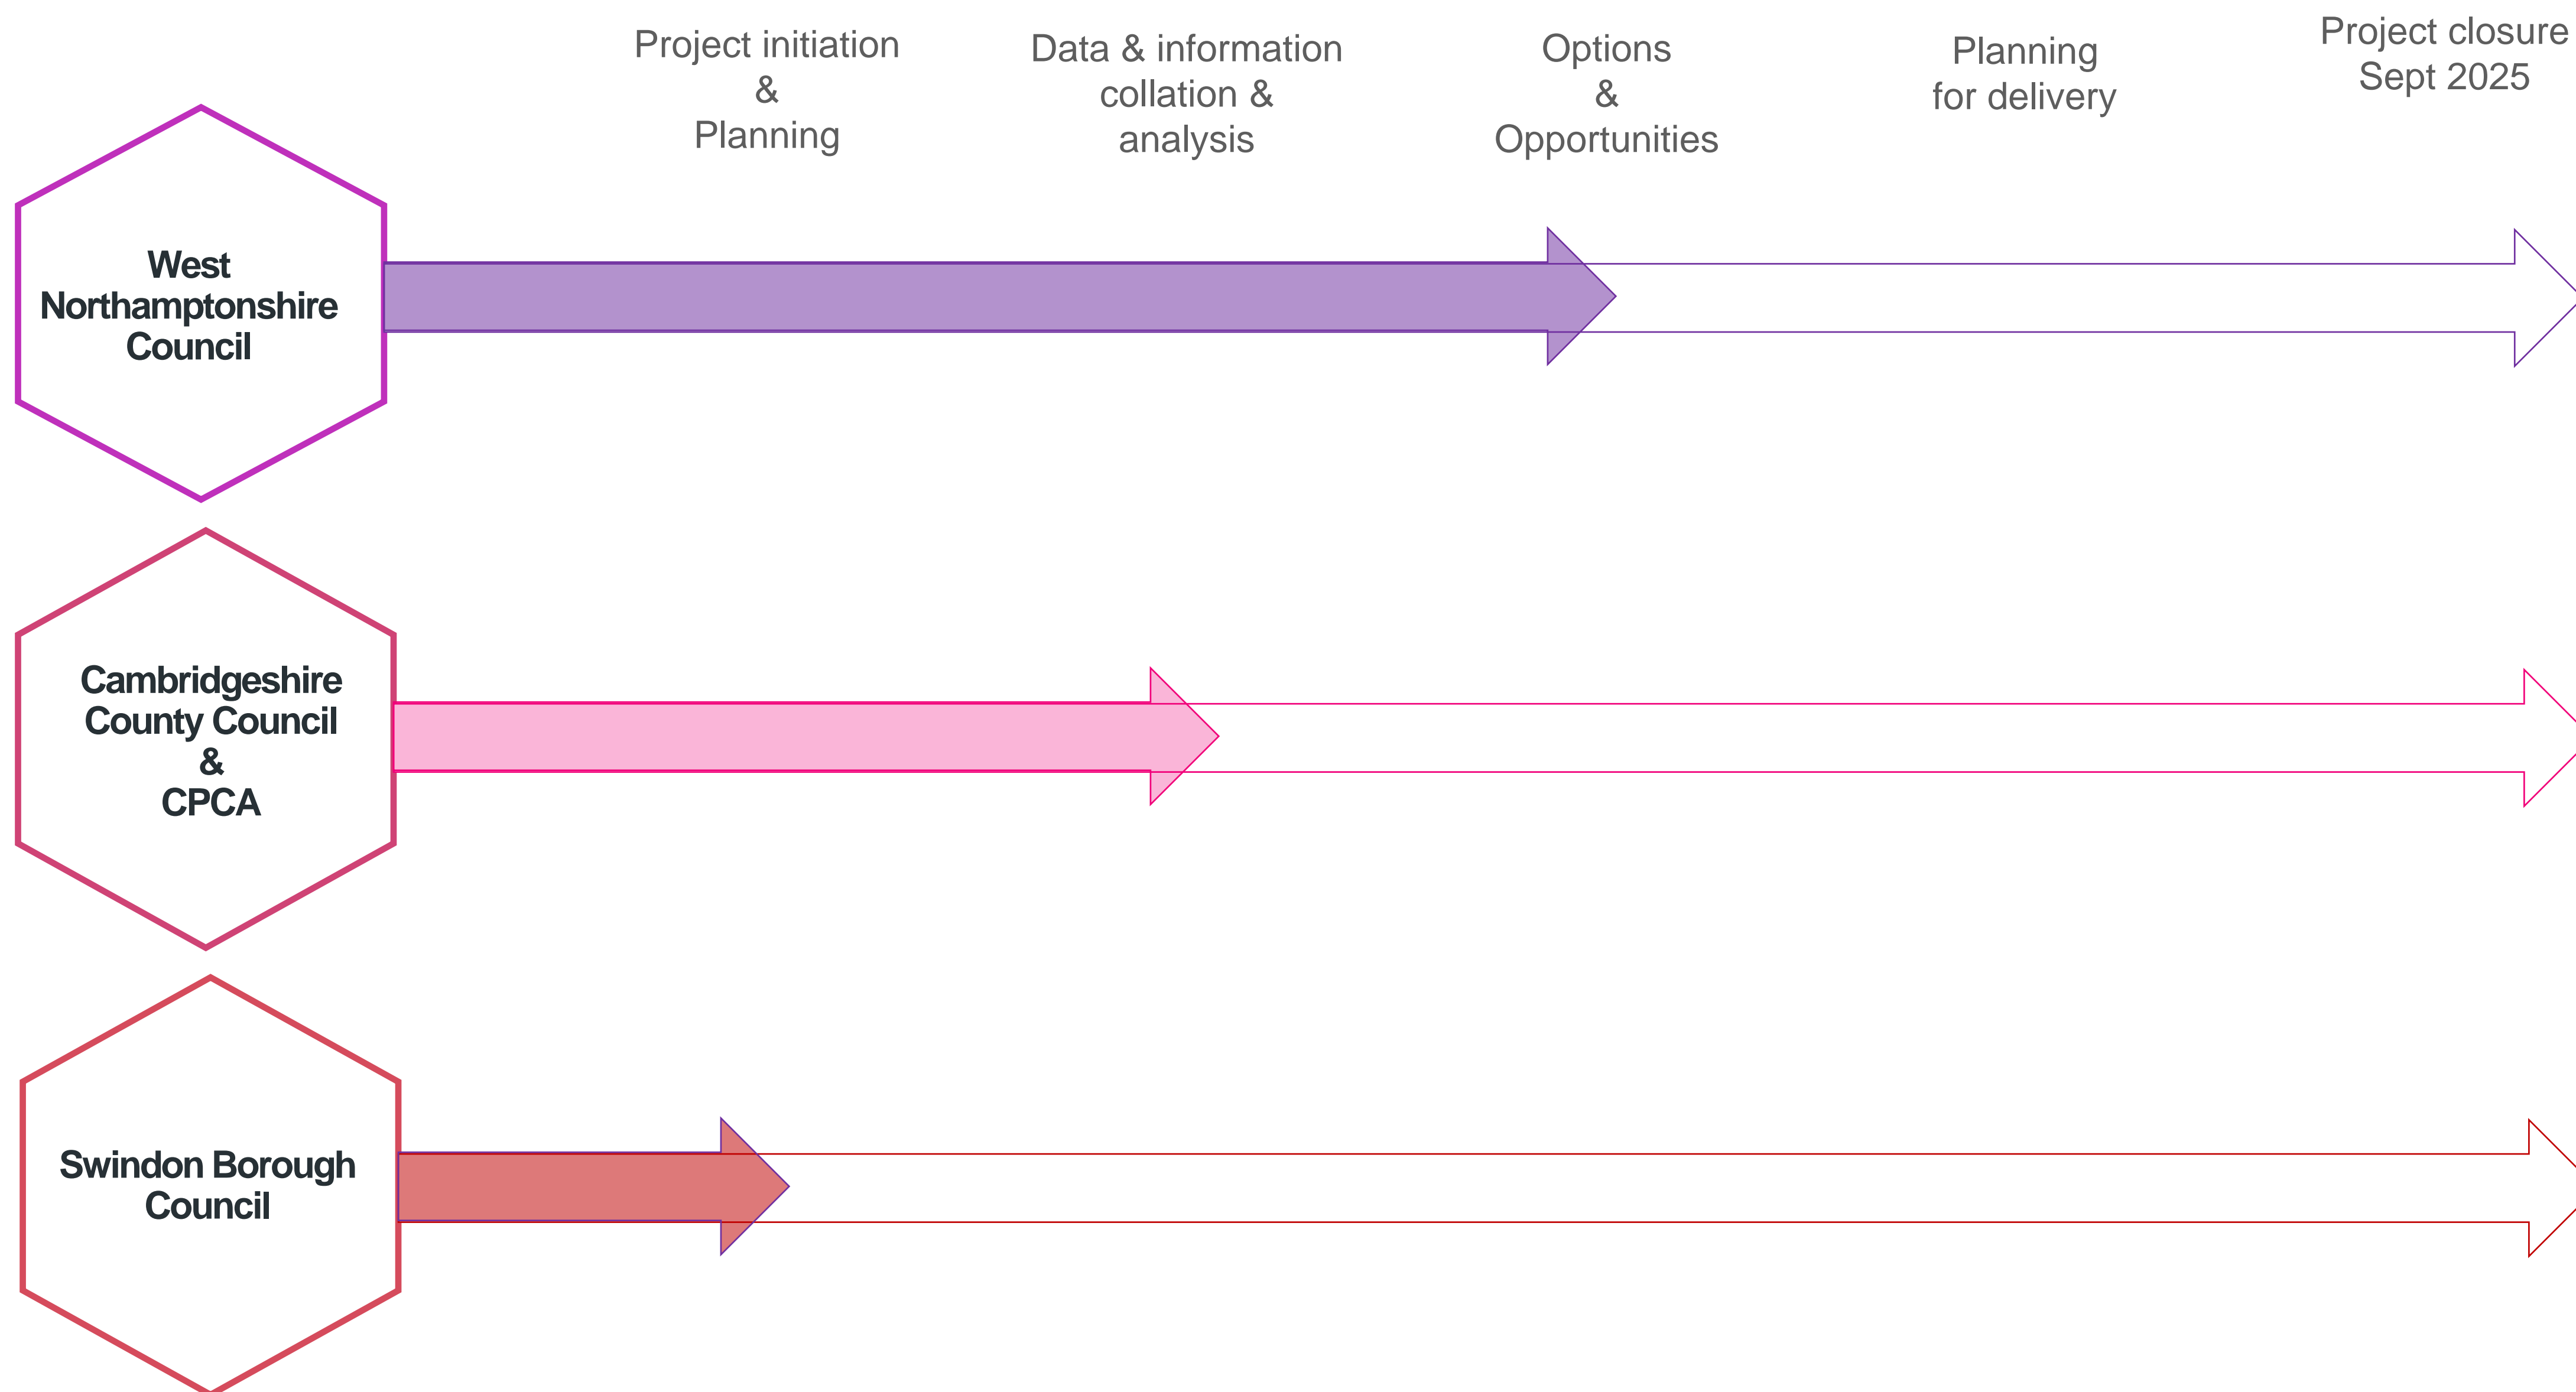

- **Data consolidation:** Improving data collection and analysis to inform decision-making.
- **Process automation:** Reducing manual tasks and increasing efficiency.
- **Demand management:** Optimising service utilisation and reducing costs.
- **Scenario testing:** Enabling evaluation of different service configurations before implementation.

The following **conditions of success** were also identified:

- Digital tools including to support data collection, analysis, and modelling
- Organisational change
- Clear senior leadership
- Cross-departmental collaboration and working
- Agile procurement processes

Programme overview

Key themes

- **Opportunities do still exist** for efficiencies, savings and integration
- A **re-thinking** and re-imagining of transport is needed at all levels from holistic demand review to integrated decision making
- Robust and accessible **data** remains a challenge
- Opportunities exist surrounding **collaboration with the supplier market**
- **Key to embracing devolution opportunities**
- **Collaborative working across EEH LAs** would be beneficial for some LAs
