

Planmeca Compact™ i5

Designed to last – made to perform

The sleek and elegant Planmeca Compact™ i5 has been designed based on several decades of research and experience. Combining revolutionary technology with luxurious design details, this intelligent unit caters even to the most demanding needs. Lightweight yet powerful, it is the dental unit everyone dreams of.

The smoothest possible workflow

Planmeca Compact™ i5 has been designed to offer the smoothest possible workflow for the entire dental team. Its lightweight design and smooth movements help you to maintain an ergonomic working position throughout the day. Everything is within easy reach, making everyday work effortless and enjoyable.

Faster routines for a faster patient flow

In Planmeca Compact i5, all essential infection control functions are integrated and neatly organised in their own compartments. The cleaning procedures are automated, and the LED indicator on the dental unit informs about their status. These functions help to speed up infection control, which in turn means a faster patient flow and improved quality assurance. Planmeca Compact i5 is the perfect answer to the growing demands of today's dentistry.

Five generations of continuous improvement

Our Planmeca Compact™ i dental unit range has tens of thousands of users around the world. They have provided us with continuous and valuable feedback, which has enabled us to refine our dental unit so that it caters to the needs of today's and tomorrow's dental professionals. Planmeca Compact i5 is the culmination of five generations of continuous improvement.

“One of the reasons I chose Planmeca Compact™ i5 was its beautiful design. Most dental units are big and heavy, whereas mine looks very modern and slim – even though it is robust and stable.

Dr Thomas Rosner
Graubünden, Switzerland
