

Planmeca Compact™ i3

Small, swift and clever

*We believe that great ergonomics, a smooth workflow and ease of use should be a necessity, not a luxury. The small, swift and clever **Planmeca Compact™ i3** dental unit is a smart choice for any dentist looking for a space-saving solution. The flexible movement range of the unit's delivery arm allows both right- and left-handed dental professionals to work comfortably in any position.*

Simplicity without sacrificing efficiency

Planmeca Compact™ i3 has been designed to simplify everyday dentistry. Easy to learn and easy to use, it is equipped with an intuitive touch panel that guides you in your preferred language. Thanks to the simplicity of the unit's design, external infection control procedures are also easy to perform. The unit can be customised to individual preferences and upgraded with the features of your choice, such as an integrated intraoral scanner.

From right- to left-hand use in 10 seconds

Planmeca Compact i3 can be switched from right- to left-hand use in just 10 seconds simply by moving the instrument console – without having to move the operating light. This makes it a practical solution for all clinics where several dentists use the same dental unit and space is limited.

Choose your favourite delivery option

A swift and space-saving solution

Planmeca Compact i3 is a truly flexible dental care unit that fits into any clinic layout. Due to its slim design and narrow backrest, the unit offers plenty of working space around it, allowing your team to work comfortably whether sitting or standing. The small instrument console can be positioned above the patient, making it easier to maintain an ergonomic position throughout the day. The unit's swivel function can be used to make fine adjustments according to your preferences.

A practical choice especially for large clinics with several users

The unique **Planmeca PlanID™** sign-in system allows dentists to access their personal settings instantly on any dental unit with a simple flash of a card. This helps clinics maximise their resources and utilise their equipment flexibly, since units no longer need to be assigned to specific users. All usage information is stored in the **Planmeca Romexis®** software – this way, large clinics and chains can benefit from knowing when, how and by whom the unit has been used.

“**Planmeca Compact™ i3** is ergonomic, comfortable and simple to use with a large movement range. Since I have had shoulder issues in the past, I was looking for a unit with over-the-patient delivery, and Planmeca had the best solution for me. I like the beauty and simplicity of the design. The right to left hand conversion is also very practical.

Dr Esther Azoulay
