

BACKEND SYSTEMS DEVELOPMENT ENGINEER

📍 Škofljica | 🌍 40+ countries | 💻 SaaS B2B

We offer you an opportunity in a rapidly growing industry!

Location: Škofljica (with the possibility of working from home after a trial period)

Do you want to create technology that actually changes the world and will significantly shape the future of all of us?

What will you do?

- Developed new back-end solutions and helped maintain and upgrade existing systems
- Collaborated with development, product, design and support teams
- Contributed to code quality (code review, unit tests, technical documentation) and supported test automation
- Contributed to the quality of technical documentation and shared knowledge
- Suggested improvements and looked for better solutions, Learned, grew and contributed ideas - your opinion counts!

What do we want you to know?

- You have experience with developing modular monoliths, microservices or WebSocket solutions
- You are familiar with the .NET environment and program in C#
- You use relational databases (ideally MS SQL)
- You also have at least basic knowledge of some non-relational database
- You know Docker (basic), GIT and tools for working in a development environment
- You write understandable, structured and documented code
- You are a team player who likes to share knowledge and learn
- You are fluent in English - at least at a technical level

Any additional advantages?

- Experience with developing Web APIs
- Knowledge of communication protocols (standard or custom)
- Experience with RabbitMQ
- Working with ASP.NET, MVC and JavaScript basics
- Basic knowledge of security practices (e.g. OWASP)
- Working in a Scrum environment

What about education?

It's not all about papers - we are looking for people with knowledge and experience.

If you have VI. or VII. degree in a technical field (computer science, electrical engineering, mathematics), great! We want someone with at least 5 years of experience in a similar role, but we can adapt if you have the right knowledge and motivation.

What do we offer you?

- Interesting work on an international project that is changing the world of mobility
- Working in a young, dynamic, fast-growing company
- Pleasant, connected and open team
- Long-term cooperation
- Working from home (flexible)
- Coffee, fresh fruit and relaxation with table tennis
- A working environment where ideas are welcome and we strive to grow together
