

SaaS platforma – celovito upravljanje infrastruktura za polnjenje električnih vozil

OCEAN EV Charging Platforma, v lasti Ocean EV Charging d.o.o., je hitro rastoči IT produkt ter eden izmed vodilnih sistemov na področju e-mobilnosti v Evropi, ki ga uporabljajo največja podjetja in multinacionalke od največjih elektro-energetskih podjetij, naftnih družb, proizvajalcev vozil in drugih vodilnih podjetij na področju elektromobilnosti. Naše rešitve so prisotne v več kot 40 državah, od Grenlandije do Avstralije.

We offer you an opportunity in a fast-growing industry!

BACKEND DEVELOPMENT ENGINEER

building the infrastructure that powers the world's e-mobility

 Škofljica |  Global |  E-mobility |  SaaS B2B

Are you a developer who wants to help create technology that truly changes the world? The **OCEAN EV Charging Platform** is one of the leading solutions for smart management of charging infrastructure – and we are now expanding our development team that builds a system used by customers from Greenland to Australia.  

What will you do?

As a Backend Development Engineer, you will build robust, scalable, and high-performance backend solutions that power global e-mobility:

- Develop new backend solutions and maintain and upgrade existing systems
- Work closely with development, product, design, and support teams
- Contribute to code quality (code reviews, unit tests, technical documentation)
- Actively propose improvements and look for better solutions
- Share knowledge and grow with the team – your opinion matters!

What do we expect?

- Experience with modular monoliths, microservices, or WebSocket solutions
- Strong knowledge of the .NET environment and programming in C#
- Experience with relational databases (ideally MS SQL) and basic knowledge of non-relational databases

- Basic knowledge of Docker, Git, and other development tools
- Writing clear, structured, and well-documented code
- Team spirit and willingness to share knowledge
- Use of English in everyday work

Advantages that matter +

- Experience in developing Web APIs
- Knowledge of communication protocols (standard or custom)
- Experience with RabbitMQ
- Working with ASP.NET, MVC, and basics of JavaScript
- Basic knowledge of security practices (OWASP)
- Experience working in a Scrum environment

What about education? 🎓

It's not all about diplomas – knowledge and experience matter most to us. If you have a Level VI or VII degree in a technical field (computer science, electrical engineering, mathematics), great! We are looking for someone with at least 5 years of experience in a similar role, but the right skills and motivation can outweigh years of experience. 🚀

What do we offer? ☀️

- Work on an international project that is transforming the world of mobility
- A dynamic, young, and closely connected team 😊
- Diverse work in a fast-growing company
- Long-term collaboration
- Hybrid work after the probation period
- Fresh fruit, coffee, and relaxation with table tennis 🍌 🍎 🍷
- A work environment where ideas matter and we grow together 🌱

📧 Application:

If you recognize yourself in the description above, send your CV in English with the subject **“OCEAN BACKEND ENGINEER”** to:
